#### Rockland Computer and Network Problems Solved for Good

To my fellow Rockland business owners,

We've launched a "One Company Revolution" because our customers tell us it's time.

Our customer tell us that before they began working with eZigma their search to find competent, timely computer repair and IT service professionals in Rockland , were as painful as the problems themselves.

And that's why we've launched our "One Company Revolution." We've re-committed ourselves to delivering knowledgeable, fast, [affordable computer support](#). We provide our services with professional, courteous, reliable technicians. And we do it for a [flat, reasonable, all-inclusive monthly fee!](#)

Perhaps as important is our ability to understand both your IT systems and how they fit into your business model. Our special skills give us the ability to understand your computing network not in isolation, but as an integral component vital to the success of your business. This provides enhanced value to you, and significantly differentiates eZigma.

The eZigma competencies radically change your IT experience. Your past associations with our industry probably were based on fixing failures. Our value proposition is the opposite. We prevent failures, and help ensure uptime for your business.

To see how important our approach has been for businesses like yours, take a few minutes to read a couple of our [case studies](#), and don't forget to read the [top 10 reasons](#) why our customers choose us to manage and support their computer network.

The honest eZigma approach may be hard for you to believe; so, I want you to see for yourself. I'll provide you with a ["Get Acquainted"](#) meeting and system analysis. Or we'll give you a [FREE two-hour "emergency" technical support call](#) at no cost or risk to you. Yes that's right, we'll give you [2 Free Hours of IT support](#), just to try our services. And I promise you'll better understand how your IT system can achieve the status of truly reliable contributor to your business success with the help of our revolutionary ["Hassle FREE IT Care"](#) program.

Off course, not every business will qualify for our ["Hassle FREE IT Care"](#) program, But those that do typically see a substantial reduction in problems, viruses, outages and down time, and typically save between 30% - 50% on their IT support costs. To see if you qualify, please complete our [brief questionnaire](#)

Let's get started! ["Email Me Now"](#) and let's begin ensuring the integrity of your information systems and your continued business success.

Neil Patel,  
CEO

### FEATURED ARTICLES

#### To Exchange or Not to Exchange.

That was the question a few of our clients were asking us. So we decided to write an article to address the issue...
